Profile Summary

I've been working in offensive security for nearly 2 years, focusing on penetration testing in both development and production environments. And then, I actively participate in bug bounty programs to sharpen my skills and stay up to date with real-world attack techniques. This combination of structured testing and independent research has helped me grow both technically and professionally within the field of cybersecurity.

Work Experience

Penetration Tester

Sept 2023 - Now

PT Caribou Siber Integra, Jakarta

-Conducted penetration test on 100+ web and API applications across production and development environments. Successfully identified and reported vulnerabilities, including Critical and High severity issues such as Broken Access Control, IDOR, XSS, and SQL Injection, resulting in significant risk reduction and improved security resilience.

-Proficient with Burp Suite and manual testing methodologies to uncover complex real-world vulnerabilities. Experienced in building detailed penetration testing reports and delivering clear remediation guidance.

-Collaborated with developers and technical teams to provide remediation guidance and secure coding recommendations.

Staff Tax Accounting - IT Support

Dec 2022 - Dec 2023

Tax Consultant Arie Paulus, Semarang

Prepared and reviewed various tax returns (individual, corporate, and partnership) with a focus on compliance and tax efficiency. Provided technical support and software setup, including Microsoft Office, antivirus, and business applications, while assisting users with Windows OS and network connectivity issues.

Education

Dear RavenskaDM,

On behalf of the National Aeronautics and Space Administration and NASA's Vulnerability Disclosure Policy (VDP), we would like to recognize your efforts as an independent security researcher, both in identifying the vulnerability you submitted and for following NASA's VDP policy and guidelines in responsibly reporting this to us.

The ability to detect and report on security vulnerabilities is a valuable skill in the information security industry. Your reporting has facilitated NASA's awareness of otherwise unknown vulnerabilities and helped us protect the integrity and availability of NASA information.

Please accept this letter as a token of our appreciation for your efforts in detecting this vulnerability, and better enabling NASA to continue its advances in science, technology, aeronautics, and space exploration to enhance knowledge, education, innovation, economic vitality, and stewardship of the Earth. We are all in this together as a security community and your participation and expertise is commended.

Sincerely,

Mike Witt
